

Kirstie Davison

Community Governor

I am a Freelance Health and Safety Consultant working across a variety of industry sectors, providing advice, guidance and training.

I currently hold the position of a Community Governor and my role involves working with the Governing Body to support our Head teacher and teaching staff to enable the delivery of good quality education.

We all have areas of specialist interest and professional skills which are focused through our involvement with sub committees and link governor roles with mine being Health and Safety Link Governor. This role has given me greater insight into the challenges faced on a day to day basis and a strategic level within the school and given me the opportunity to work with various team members, utilising my knowledge, skills and experience. I also sit on the Premises subcommittee and the Performance Management Committee.

This role is interesting and rewarding and has allowed me to develop a greater understanding of the inner workings of our school, reinforcing my confidence in the education, environment and care of my three children, plus enabling my own continuing personal development.
